# WARTHAN DERMATOLOGY CENTER AND AESTHETIC, LASER & SURGERY CENTER

“Let Our Family Take Care of Yours”

By TAMMY ADAMS | Photography by JBECK PHOTOGRAPHY

*“Regular skin cancer screening is important in detecting any changes in moles as early as possible which increases the chance of successful treatment”*

**A**t Warthan Dermatology Center in McKinney, the motto “Let our family take care of yours” is more than just a nice figure of speech. Sisters Drs. Mandy Warthan and Molly Warthan, both dual board-certified dermatologists, work together every day, taking care of their patients as if they were members of their own family. The two are affectionately known as Dr. Mandy and Dr. Molly by their patients, and they come from a long line of medical professionals. In fact, their father is a dermatologist in their hometown of Nacogdoches, Texas.

#### PATIENT-CENTERED CARE

Dr. Mandy and Dr. Molly are the only sisters in the country practicing together as both a dermatopathologist, which is Dr. Mandy's specialty, and a Mohs micrographic skin cancer surgeon, which is Dr. Molly's specialty. “Our patients tell us all the time how they really appreciate that we are a one-stop shop where they can have all of their dermatologic needs addressed—from a skin cancer screening, to biopsy results, to surgery—in one office,” said Dr. Mandy.

Additionally, Warthan Dermatology Center opened the doors to the Aesthetic, Laser & Surgery Center last year. It is conveniently located just a few doors down so that patients can also enjoy the most advanced skin care procedures available. “Our practice is thriving

and growing and we are so happy to be able to offer the very best and most comprehensive care possible at both locations,” she added.

#### DR. MANDY WARTHAN

Dr. Mandy is board-certified in dermatology and dermatopathology. Fewer than three percent of dermatologists become dermatopathologists. Dermatopathology is focused on the microscopic diagnosis of skin cancers and moles. She is the only female dermatopathologist in McKinney. Dr. Mandy graduated from Southern Methodist University and completed medical school at the University of Texas Medical Branch in Galveston. She then completed a fellowship in dermatopathology at UT Southwestern in Dallas and her residency at Medical college of Georgia before opening Warthan Dermatology in 2010.

#### DR. MOLLY WARTHAN

Dr. Molly also graduated from Southern Methodist University and went to medical school at the University of Texas Medical Branch in Galveston. She received her fellowship training in Mohs micrographic surgery in Tallahassee, Florida and her residency at Eastern Virginia Medical School. She is board-certified in dermatology and fellowship-trained in Mohs surgery, a specialized type of skin cancer surgery that is mainly used for skin cancers on the head and neck and recurrent, complicated skin cancers. She is the only fellowship-trained Mohs surgeon in McKinney.

#### IMPORTANCE OF SKIN CANCER SCREENINGS

Are you aware that malignant melanoma is the fastest growing cancer in the entire United States? It is the number one cause of death from cancer in women ages 25 to 35 and one in 26 people will be diagnosed

with a melanoma in their lifetime. These statistics are staggering and, for this reason, the physicians at Warthan Dermatology Center are huge proponents of annual skin cancer screenings for all their patients.

“Regular skin cancer screening is important in detecting any changes in moles as early as possible which increases the chance of successful treatment,” said Dr. Mandy. “We perform full body skin exams to screen for benign or cancerous lesions that patients may not be able to see or recognize on their own. A skin biopsy may be performed if any abnormal moles or lesions are found. Schedule an appointment today and find out even more ways to protect yourself and your skin.”

#### LOVE THE SKIN YOU'RE IN

The Aesthetic, Laser & Surgery Center include Botox, Dysport, Juvéderm and Restylane. The Fraxel Laser CO2 Resurfacing is used for deep wrinkles and acne scars, and the Zeltiq CoolSculpting device freezes away unwanted fat without needles in one hour.

Warthan Dermatology Center also offers laser hair removal, photofacials, spider vein treatment, chemical peels, microdermabrasion, skin tightening and facials. Physician-grade skin care available includes Obagi, Neocutis, Revisions, Elta MD, Jane Iredale and Clarisonic. Complimentary skincare consultations are also available with certified aestheticians.
