Warthan Dermatology Center
Let Our Family Take Care Of Your Family

It's not every day that you come across sisters who are both physicians, and it's certainly rare for sisters to practice medicine together. At Warthan Dermatology Center, sisters Dr. Mandy Warthan and Dr. Molly Warthan practice together and say, "Let our family take care of your family." Dr. Mandy and Dr. Molly, as they are affectionately known by their patients, are both board certified dermatologists. What is really amazing is that they are one of the only sister duos of dermatologists practicing together in Texas. And, what is even more impressive is that they are the only sisters in the country practicing together as both a dermatopathologist, which is Dr. Mandy's specialty and a Mohs micrographic skin cancer surgeon, which is Dr. Molly's specialty. This makes Warthan Dermatology unique in that you can have all of your dermatology needs met in one place from a complete skin cancer screening, to biopsy results, to surgery all treated in one office. Warthan Dermatology Center recently opened a second location, an aesthetic laser and surgery center dedicated to offering patients the most advanced skincare procedures available!

Both sisters graduated from Southern Methodist University and completed medical school and internships at the University of Texas Medical Branch in Galveston. Dr. Mandy completed her dermatology residency at the Medical College of Georgia and a fellowship in dermatopathology at UT Southwestern in Dallas. Dr. Molly completed her dermatology residency at Eastern Virginia Medical School and a fellowship in Mohs micrographic surgery in Tallahassee, Florida.

Dr. Mandy Warthan is board certified in dermatology and dermatopathology. Fewer than three percent of dermatologists become dermapathotopologists. Dermatopathology is focused on the microscopic diagnosis of skin cancers and moles. Dr. Mandy is the only female dermatopathologist in McKinney.

Dr. Molly Warthan is board certified in dermatology and fellowship-trained in Mohs surgery. Mohs micrographic surgery is a specialized type of skin cancer surgery that is used mainly for skin cancers on the head and neck and recurrent, complicated skin cancers. During her fellowship, Dr. Molly performed over 1,000 Mohs surgeries, including training in surgical reconstruction on the head and neck by a plastic surgeon. She is the only fellowship-trained Mohs surgeon in McKinney.

Both doctors have participated in dermatology research and been published extensively in academic journals. They have been quoted in *The New York Times* and Dr. Molly had a scheduled appearance on the NBC *Today Show*.

Warthan Dermatology treats skin diseases in patients of all ages including children, adults and seniors. Medical treatments include skin cancer screenings, skin cancer surgery, mole removal, acne, rosacea, psoriasis, and eczema. Cosmetic services include Botox, Dysport, Juvederm and Restylane, Fraxel Laser CO2 Resurfacing for deep wrinkles and acne scars, Zeltiq CoolSculpting to freeze unwanted fat away, laser hair removal, photofacials, spider vein treatment, chemical peels, microdermabrasion, skin tightening, and facials. Warthan Dermatology Center offers physician-grade skincare including Obagi, Neocutis, Revisions, Elta MD, Jane Iredale Makeup and Clarisonic. Complimentary skincare consultations are available with their aesthetician. Whether improving your appearance with small subtle changes or restoring your face for a more youthful glow, Warthan Dermatology Center is focused on combining the latest technologies and skincare to achieve your rejuvenation—you can look and feel your best! Both doctors are respected by their peers as accomplished dermatologists with genuine empathy for their patients.
